

TOX® Presses 2 – 2000 kN

Data sheet 60.00
2024/02

TOX® C-Frame Press

Series PC

Drive example: Powerpackage type Q-S
SH = protective hood
ZWK = tool holding fixture

**With STOE 2
(2-column ram guide)**

**With STOE 4
(4-column ram guide)**

Accessories (optional)

- Tool holding fixture ZWK
- 2-/4-column ram guide STOE
- Protective hood SH

TOX® C-Frame Benchtop Press

Series CEB

Drive example: Powerpackage type Q-S
ZWK = tool holding fixture
ZFS = compensating slide

C-frame type CEB

- Basic design
- Flexible flame-cut steel parts
- Ideal for robot tool guidance or short working strokes

Accessories (optional)

- Tool holding fixture ZWK
- Compensating slide ZFS

TOX® Presses CEB

TOX® C-Frame Benchtop Press

Series CMB

C-frame type CMB

- Flexible flame-cut steel parts
- With integrated ram (slider guided)
- Tool can be mounted without additional components

Accessories

Extensive range of accessories available.

Note

Frames provided with different hole patterns - equipped for all types of drives.

TOX® C-Frame Press

Modular press programme series CEJ

C-frame type CEJ

- Flexible flame-cut steel parts
- Ideal for most different applications

Support CER

- Solid welded construction with large open space
- Best accessibility

TOX® Presses CEJ 50

Type	Max. loading capacity kN	Stroke	A	B	C
CEJ 50.100	50	100	100	75	40
CEJ 50.150	50	100	150	115	40

TOX® Universal Base Frame

Series UUM

TOX® Universal Base Frame UUM

- Tailored to the modular press system
- Integrated control cabinet available
- Special welded design versions

Technical data

	UUM 500.100	UUM 1-300.000
Table size:	1055 x 855 mm	920 x 830 mm
Table height:	775 – 950 mm adjustable	750 – 925 mm adjustable
Load capacity /total press weight:	max. 1000 kg	max. 500 kg
Weight:	250 kg	185 kg
Standard colour:	TOX® green	TOX® green
Controls:	■ Accepts 2-hand control panels: STE 003; STE 325; STE 336 and pneumatic control panel STP 03. ■ Integrated switch cabinets at both sides (optional: side mounted)	
	■ Accepts all TOX® Control Panels ■ Switch cabinets can be mounted on sides	

TOX® Press Safety

TOX® Safety Device CLX

Function:

After actuating the start key, the pneumatic cylinder inside the housing extends forward. The guide plate advances towards the piecepart. The spiral sleeve rings provide protection around the tooling area. Once the guarding has reached its bottom position, the sensor sends a signal to the press drive via the limit switch. This initiates the working stroke without any risk to the operator.

Function:

- The TOX® Safety Device CLX is a standard component of the foot pedal control STE317-....
- It can also be used with 2-hand controls in place of safety guard enclosure.

Note:

Mounting plate, spacer plate, centering plate and guide plate are dependent on the machine type.

TOX® Target Feature with light spot ZL

Targeting device for e.g. precise positioning of TOX® Clinch Points, by adjustable laser beam to the die centre.

TOX® Press Safety

TOX® Safety Guard Enclosure SU

For the TOX® Presses and base frames we offer appropriate three-sided guards. The standard execution comprises an aluminium frame with polycarbonate filling or perforated plate. It is possible to protect the loading side by light barriers or by a safety guard door.

Compatible with:

- TOX® Presses
- TOX® Universal Base Frames

When ordering as separate accessory, please state dimensions or add a drawing of the press or base frame.

TOX® Restraint Device ZHE

The TOX® Restraint Device prevents the lowering of the ram with tool by its own weight during maintenance or repair work. A safety switch integrated in the emergency stop circuit fulfills the requirements of the press standards. Two design variants are offered:

Angle variant

The **angle variant ZHE000** is mounted to the side of the press frame. As it is located outside the tool area, the space requirement is not of the importance.

Compatible with:

- TOX® Presses type MC, MCC and CMB

Rod variant

The **rod variant ZHE016/030** is mounted direct between base and ram plate. Its design depends on the moving mass to be supported and the clearance height. This must be taken into consideration for the dimensioning of the tool.

Compatible with:

- TOX® Presses type PC, MB, MBG, MA and MAG

Both variants have their parking position outside the tool area.

Rod Ø depending on press size approx. 30 - 50 mm.
