

Jürgen Sollner strengthens the management team at TOX® Germany as Managing Director of Technology

TOX® completes its management team

Since the 1st of June 2025, Jürgen Sollner has been the new Managing Director for Technology, Development, Application, and Documentation at TOX® PRESSOTECHNIK SE & Co. KG in Weingarten. He will support Dietmar Weik, who is responsible for Sales, Marketing, Service, and Corporate Operations, and Benjamin Mayer, who is responsible for Production & Supply Chain.

Jürgen Sollner, the 55-year-old graduate physicist, has been with TOX® since 2012 and was previously responsible for software, electronics, and systems development. With his many years of experience, his deep technical understanding, and his close involvement in the company's processes, he is ideally qualified for his new role as Managing Director of Technology. The focus will be on innovative technologies to increase customer value. For him, time-to-market is a key concern in this new position. "Above all, I want to significantly shorten the time between development results and market launch," he emphasizes.

TOX® is a family-owned company based in Weingarten that has been closely connected to the region since its founding. Jürgen Sollner sees this mature environment as an important factor in driving technical innovation with regional roots and a global outlook.

In addition, Jürgen Sollner and Benjamin Mayer will be joining the Global Executive Management Team to lead the entire company into the future together with Dietmar Weik and all those responsible in Weingarten and in the subsidiaries.

About the company:

TOX® is a supplier of presses, systems as well as components for sheet metal joining and assembly technology. Since its foundation in 1978, the family business has become a global player with more than 1500 employees worldwide, over 500 of which are based at the headquarters in Weingarten near Ravensburg, Germany. The success story started with one pneumohydraulic drive – the TOX® Powerpackage. The “Components” division now includes pneumohydraulic and electromechanical drives as well as controls, sensors and software for process monitoring and quality assurance. In addition to a large range of presses, the system range comprises manual, machine and robot tongs. Another mainstay are modern sheet metal joining procedures, also incorporating the TOX® Clinching Technology, which makes the company today’s market leader.

Drives, processes and systems from TOX® can be found at automotive manufacturers and their suppliers as well as at industrial businesses for household appliances, electronic components, furniture and much more. Special versions of the TOX® Drives are also approved for the food industry.

TOX® is represented worldwide: 18 subsidiaries, amongst others in the USA and South America, Europe and South Africa, India, China and the entire Pacific Region. 18 representatives in many other markets support and advise local customers.
