

Benjamin Mayer is the new Managing Director Production & Supply Chain at TOX

Top management expanded

Benjamin Mayer has been the new Managing Director Production & Supply Chain at TOX PRESSOTECHNIK in Weingarten since July 1, 2024. He supports Dietmar Weik, who is responsible for Sales and Technology. Mayer has extensive experience in the areas of production, purchasing and supply chain management.

45-year-old Benjamin Mayer is responsible for the Production & Supply Chain functions at the TOX sites in Germany and the Czech Republic. His tasks include the global coordination of production processes and procurement activities for the supplier of components, systems and customer-specific special machines. The graduate engineer (FH) specializing in production technology can draw on many years of experience at various market-leading manufacturing companies. He has gained extensive project experience at home and abroad. He has also spent various periods in Asia. "In my new role, I want to consistently align the entire value creation process with the needs of our customers," says Mayer.

About the company:

TOX® is a supplier of presses, systems as well as components for sheet metal joining and assembly technology. Since its foundation in 1978, the family business has become a global player with more than 1.500 employees worldwide, over 500 of which are based at the headquarters in Weingarten near Ravensburg, Germany. The success story started with one pneumohydraulic drive – the TOX® Powerpackage. The “Components” division now includes pneumohydraulic and electromechanical drives as well as controls, sensors and software for process monitoring and quality assurance. In addition to a large range of presses, the system range comprises manual, machine and robot tongs. Another mainstay are modern sheet metal joining procedures, also incorporating the TOX® Clinching Technology, which makes the company today’s market leader.

Drives, processes and systems from TOX® can be found at automotive manufacturers and their suppliers as well as at industrial businesses for household appliances, electronic components, furniture and much more. Special versions of the TOX® Drives are also approved for the food industry.

TOX® is represented worldwide: 18 subsidiaries, amongst others in the USA and South America, Europe and South Africa, India, China and the entire Pacific Region. 20 representatives in many other markets support and advise local customers.
